

Email Security for your business

Email filtering and archiving for your mailbox

B U S I N E S S

Protection for your mailbox...

With our Email Security, you can be safe in the knowledge that you'll never lose any essential email traffic. Avoid the nasty pitfalls of increasing spam to your mailbox with the Anti-spam and Anti-virus features, which block 99% of all incoming spam. Plus, it's enhanced by Disaster Recovery and full archiving options, giving you peace of mind when it's needed the most.

With our Email Security you'll also benefit from:

- ✓ No software installation
- ✓ Enable on a per-mailbox basis
- ✓ Interception before reaching your server
- ✓ 99% enterprise-class email filtering
- ✓ Up to 1 year or 10 years archiving
- ✓ Fully-hosted service
- ✓ No investment in fixed assets/heavy hardware
- ✓ Takes effect to your accounts immediately

No software to install or maintain

Everything happens before your network

Email Security

Email Security is the ultimate hosted email protection service delivering peace of mind to your clients.

It is specifically designed for the MessageStream Hosted Exchange service and any businesses that have on-site servers such as Microsoft Exchange, Windows Server Essentials (or Small Business Server), an SMTP mail server, or any remote SMTP service. It provides a ring of security around your email, ensuring it remains secure and free from spam and known viruses.

Duplicated and tamperproof secure archives		✓
Archives inbound and outbound email		✓
Archives internal email from designated mailbox		✓

Increased protection

Our Email Security adds an increased layer of protection against spam and virus threats, ensuring that over 99% of spam is identified and removed before it reaches your mailbox.

Not only this but any spam is quarantined for 14 days, meaning that you can inspect and resend any messages that you wish to receive.

First-class Email Security

Email Security archives all inbound, outbound and internal email for up to 10 years, resulting in easily tracked and safe corporate mailboxes.

Your emails are indexed, compressed and securely archived in real time at twin geographical independent data centres. You are also able to view and retrieve each email independently or group thousands by date, providing you with the tools to recover archived emails quickly and easily back into your mailboxes.

Keep your data safe with our Email Security
